1) Run the *Script.sql* on SQL Server 2019 (the "Inserts" help you with some initial data)

2) Open the Visual Studio (VS) 2019 solution for ReactCrudLibrary

3) Confirm it has the below Framework\packages* installed
   Tools >> NuGet Package Manager >> Manage NuGet Packages for Solution

   .NET Core 2.2, Microsoft.AspNetCore.All, Microsoft.EntityFrameworkCore.SqlServer and Microsoft.EntityFrameworkCore.Tools

4) Run IIS Express on VS which will open the web page as follows:
   http://localhost:60817/
